TELECON WITH W. R. NORWOOD

HOA:NSR-2606

Mr. Norwood, HICOM of the Trust Territory called us on the phone Tuesday November 22. Mr. Bonnet was out of the office so Mr. Norwood talked to T. H. Blankenship and myself. He was interested in knowing what we had found out about returning Bikini to the former residents. We told him NVO had furnished some information, but that since Bikini was under the control of DOD there was not much we could do about it. He stated he would write to DASA thru the Dept. of Interior. He said the matter was urgent since he must relocate the people living on the Island of Kili and they would prefer to return to their previous home Bikini.

We told Mr. Norwood that if DASA released the six Radsafe sites we would like to retain the site and three buildings on Utirik. He was agreeable to that.

Mr. Norwood stated he had found out in Washington that the war debris problem was tied up in war claims against Japan, so the two test vessels in question could not be used to trade for cleaning up war debris.

Mr. Norwood stated he was sorry his tight schedule would not permit him to visit our office but that he would be back in February and would try to visit us then.
